Bowel Preparation for Colonoscopy With Suprep Bowel Prep Kit

Colonoscopy is a routine, generally safe, pain-free procedure used to examine the colon. These are the steps that you must take before the procedure to ensure the highest level of safety and effectiveness.

1. Make arrangements to have someone drive you home after the procedure. Colonoscopy involves sedation, and you will not be allowed to leave the facility unaccompanied.
2. Follow your physician's instructions regarding medicines to avoid and diet to follow before your procedure.
3. Your body loses significant amounts of fluid during bowel preparation. In order to prevent dehydration, it is important to supplement that fluid loss with clear liquids throughout the day.
